

Hello!

Please allow me to introduce CodeHers, a collaboration of over 40 girls from 9 different international schools in Hong Kong.

Our mission is to help address the gender disparity within Computer Science. As you would be aware, currently only around 20% of Computer Science majors are women, and we hope to inspire young girls to gain the courage to explore the subject.

We are planning an event, and would love to discuss your possible involvement!

Date & time:	Saturday 9th March 2024, 12 noon to 6 pm
Venue:	Chinese International School, Braemar Hill
Goal:	300 participants from across our 9 schools and beyond

The content of the event will consist of:

- Guest speaker presentations
- Concurrent workshops on technical and non-technical topics
- Interactive technology demonstrations and displays in an exhibition space

We are looking for organisations that may be able to generously support us in the following ways:

- Hosting a concurrent workshop presentation on a topic of interest
- Operating an interactive display & information booth in the event exhibition space (perhaps demonstrating a new or emerging technology such as AR/VR/robotics, or sharing previous projects by your organisation)
- Donation of door prizes or other merchandise for distribution to participants
- Other support as you may be able to provide (sponsorship of t-shirts is one area we are seeking)

If you may be able to assist, or would like to discuss further, please make contact via email at [pab@shatincollege.edu.hk](mailto:pab@shatincollege.edu.hk) or [lamt13@stconline.edu.hk](mailto:lamt13@stconline.edu.hk)

Sincerely

Paul Baumgarten  
Coordinating teacher for CodeHers  
Computer Science teacher  
Sha Tin College

Audrey Lam  
Head of CodeHers
