

# CodeHers

BY GIRLS FOR GIRLS

## INTRODUCTION

We are a Girl coding initiative of to inspire and empower girls to delve into the world of STEM & Computer Science and to dismantle the long-standing gender stereotypes prevalent in this field. In this event, we encourage girls to challenge themselves to new heights within different fields of STEM. We will be providing a variety of workshops which are either hosted by fellow students or distinguished guest speakers. There are different workshops available for those at different levels so even girls with zero STEM background are welcomed to join!

## RECAP 2025

### HACKATHON

Teams have to come up with innovative proposal to tackle a given problem through collaboration in order to win the competition. The selected finalists then receive an opportunity to pitch and present their idea to the honored guest judges. More information will be release soon!

### XP SYSTEM

Participants will each get a QR code and a scanner. XP points can be earned through scanning QR codes placed around the venue, as well as those from other participants! This is a wonderful to make new friends and bond with one another during the event. XP points earned can be used to exchange amazing prizes that we prepared, so try your best to earn as much XP as possible!!

### KEY-SPEAKER

STEM professionals are invited to be our key speakers, sharing their own experiences and giving out valuable advices. Experts include Camille Or from Google, Rebecca Yip from Day Zero Platform, Cathy Hui from PyLadies will all be there. Don't miss out this precious and insightful event!
